Brian Hubbard
Account Manager, G2
National Cybersecurity Framework

In February, 2014, the National Institute of Standards and Technology (NIST) will release the final form of the Cybersecurity Framework, in response to President Barak Obama's Executive Order (EO) 13363 "Improving Critical Infrastructure Cybersecurity" (February, 2013). EO 13363 directed the federal government to work with industry leaders to develop a voluntary Framework to reduce cyber risks to America's critical infrastructure. The Framework consists of standards, guidelines, and best practices to promote the protection of critical infrastructure. The prioritized, flexible, repeatable, and cost-effective approach of the Framework helps critical infrastructure owners and operators to manage cybersecurity-related risk while protecting business confidentiality, individual privacy and civil liberties.
