October 29, 2014			
November 19, 2014			
December 17, 2014			

July 23, 2014 Speaker
Wayne Beekman, Information Concepts

Wayne Beekman started Information Concepts in 1982 with his partner, Cary Toor, to provide fixed-price custom software development services to the Public and Private Sectors. Information Concepts specializes in the design and implementation of Mission Critical, Database Applications. Clients include NASDAQ, IRS, and PBS.

For the past 30 years, he has directed the technical direction of the firm, navigating changing technical platforms. Solutions have transitioned from the Mainframe, Client-Server architectures, Web Based projects, to Cloud Based platforms today. Throughout his tenure, he has always utilized visualizations as part of the requirements gathering planning process. Mr. Beekman holds a BBA and a Masters of Science in Information Systems from George Washington University. He lives in Great Falls, Virginia with his wife and two daughters.

July 23, 2014 Topic
"Getting Requirements Right...The First Time"

Albert Einstein once said, If I can't see it, I can't understand it. This is the basis for utilizing visualization tools in the requirements gathering phase of software development projects.

Most projects that fail are due to miscommunication between the business stakeholders and the development team. Visualization tools combat this, allowing you to quickly see your software solution before a single line of code is written. Advanced visualization tools enable extremely rapid prototyping with online publishing and critiquing that can cut the time and cost of requirements gathering in half.

Visualization tools make traditional requirements sessions appear heavy and arduous. The resulting simulation is so rich in functionality that you can actually show your stakeholders what they are going to get. In fact, the prototype is so robust that it can be used for training purposes while the development effort is underway.

This seminar is designed to discuss tools that engage stakeholders and get the requirements right, the first time, before development begins.

June 2014 Speaker
Mr. Jeffrey B. Israelitt

Mr. Jeffrey B. Israelitt is currently an Independent Consulting Professional specializing in Management, IT, Information Security, Audit, and Risk, with over 30 years of experience in the Federal Government and the Commercial Sector. After his military career, he worked as both a DOD civilian and a DOD contractor. Mr. Israelitt has led and managed large and small organizations and been a Trusted Advisor for Senior Executives. He has managed numerous teams performing information security, audit, and risk activities within the Federal Government and the Intelligence Community, and been an IT Service Provider's Commercial IT Outsourcing Security Manager and Project Manager on multiple contracts. Mr. Israelitt has a M.S. in Management from the Florida Institute of Technology, a Military Graduate Program Certificate in Computer Engineering from the U.S. Air Force Institute of Technology, and a B.S. in Computer Science from the University of Southern Colorado (w/co-op at the U.S. Naval Underwater Systems Center, New London, CT). He is a Certified Information Security Manager (CISM), Certified Information Systems Auditor (CISA), and is Certified in Risk and Information Systems Control (CRISC). Mr. Israelitt has previously spoken to industry professional groups on managing Business Risk, Audit, and Information Security in Enterprise level IT and IT Outsourcing, and has testified publicly before a State Public Service Commission (PSC) on multiple topics including Business Risk and Privacy.

June 2014 Topic
"Inside an IT Outsourcing from the Perspective of a Service Provider's Security, Audit, and Risk Professional"

INTENDED AUDIENCE – Professionals in Information Security, Audit, Risk, and Internal Control, and their Managers, will benefit from this event.

OBJECTIVE 1 – Familiarize attendees with different types and phases of IT Outsourcing and the Acquisition of IT Outsourcing services by Organizations in the Federal Government and the Commercial Sector.

OBJECTIVE 2 – Identify the composition of typical service provider teams and team member responsibilities, given different types and phases of IT Outsourcing, and how to work with client teams whose composition may differ.

OBJECTIVE 3 – Examine how various security, audit, and risk factors are identified and managed throughout the IT Outsourcing engagement.
