January 28, 2015 Speaker Kathy Worgul – State of Maryland

Kathy is a Professional Trainer for the State of Maryland at the Business and Employment Resource Center in Westminster, MD. She facilitates weekly job search workshops on a range of topics, including LinkedIn, both Basic and Advanced. She has more than 15 years' experience in career counseling and has previously worked for George Washington University and the University of Texas at Austin. She holds a Master of Education degree from Millersville University, Millersville, PA, and a Bachelor of Science degree from Houghton College, Houghton, NY. An Army brat and a West Point Mom, Kathy has moved more than 26 times, and now lives with her family in Westminster.

January 28, 2015 Topic

How Can LinkedIn Assist in Career Advancement

This workshop is designed to assist participants in their use of LinkedIn for both job search and career advancement. It will include some of the basic elements of a site tour, profile development and the use of search tools. In addition, this session will provide a look at more in-depth strategies to aid in increasing profile visibility and enhanced networking. After a brief lecture with demonstrations, the workshop will use a question and answer segment to address the specific concerns of the attendees.

December 17, 2014 Speaker Larry Letow - Convergence Technology Consulting

Larry Letow has over 30 years of sales, operations and finance experience in the information technology industry. Larry Letow is the CEO/President of Convergence Technology Consulting and is responsible for the vision and leadership of the organization. Prior to joining Convergence Technology Consulting, Larry served as Sr. Vice President of Infinity Consulting Group, where he held overall responsibility for expanding the corporate business in the Southeast Region, including corporate operations and marketing. Larry received his Bachelor of Arts in Government and Politics and minors in Sociology and Criminal Justice from the University of Maryland in 1983.

He is the co-founder of the National Cyber Security Hall of Fame and is a member on the Board of Directors for CyberMaryland and the State of Maryland Cyber Task Force. He is also a member of the Board of Directors of Governors Workforce Investment Board, GovConnects, Tech Council of Maryland and Baltimore Washington Corridor Chamber. He is also a member of the Board of Visitors for Towson University and University Systems of Maryland Foundation Board.

Larry was awarded the BWCC Hall of Fame in 2014 and Baltimore Washington Corridor Person of the Year in 2010. He is also involved in charitable organizations The Little Things for Cancer, Cystic Fibrosis Foundation, and Ulman Cancer Fund.

December 17, 2014 Speaker Jim Mazotas - Intelligent ID

The founder of Intelligent ID, Jim is responsible for design, technology and strategy, including all aspects of product design and development. He is also the patent author for the Intelligent ID technology and is presently designing future applications and improvements for exclusive use within the Intelligent ID framework. Jim has extensive experience in developing new technical business strategies and solutions for many Fortune 500 companies worldwide. He was founder and CEO of Plannet - a leading provider of innovative security and networking products and services for small and medium sized businesses, which was sold to CareWorks Technologies. Prior to Plannet, Jim held senior technical positions with Toyota, Lockheed Martin, Department of Defense and AT&T, where his contributions positioned the organizations for successful implementations of advanced technologies.

Jim has received several awards and honors, including the 2005 Columbus TopCAT (Top Contributors for Advanced Technology) Award for outstanding business and the 2003 Presidential and National Leadership Award from the Business Advisory Council.

December 17, 2014 Topic

Insider Threat Resolve Through Employee Monitoring

Intelligent ID is an Endpoint Management and Protection framework that protects government, military and commercial organizations from insider threats by continuously monitoring, analyzing, and alerting management in real time to potentially malicious behavior including classified data loss, misuse of credentials, workplace violence, or unauthorized infrastructure violations

Intelligent ID's lightweight agent has been designed from the ground up to have minimal endpoint impact, both in resource consumption and user experience. We operate seamlessly and non-invasively on the endpoint, causing no interruption of workflow or efficiency.

Highly customizable and flexible enough to meet the needs of any organization, Intelligent ID's framework of quickly configurable rules and compliance items allow administrators to build a set of monitoring guidelines to meet their precise needs.
