July 27, 2016 Speaker

Mark Goldstein

Deputy Chief Information Security Officer for Forcepoint

Mark Goldstein is CISO for Forcepoint responsible for assisting with security and privacy challenges faced by all organizations and offering strategic advice on applying technology to meet the challenges.

With a career in cybersecurity and privacy spanning over 20 years, Goldstein has an array of experience in IT, security, sales, marketing, customer support, legal, and privacy in commercial enterprises. Goldstein worked at America Online for over a decade leading customer-facing cybersecurity programs before becoming a cybersecurity consultant advising financial institutions, commercial customers, government contractors, trade associations, and the Department of Homeland Security.

Goldstein founded the “Malvertising Working Group.” Goldstein is a senior advisor for the Online Trust Alliance, a mentor at MACH37 (cybersecurity incubator), and a member of the Northern Virginia Tech Council’s Cybersecurity & Privacy Committee, Industry Botnet Group, as well as Infragard. Goldstein holds the CIPP and CISSP certifications along with a MBA from American University.

July 27, 2016 Topic Insider Threat

Insider threats have the upper hand in many organizations and IT Security staffs can easily be overwhelmed by the noise of false alerts caused by multiple tools that don't talk to each other. These well-intentioned tools end up adding more complexity, less security and allowing insider threats to go undetected. Learn how best to identify and stop insider threats before a breach occurs and confidential data can be stolen. We'll share valuable insights into how you can build a world class program to keep your data safe from insider threats, including:

- * Today's Insider Threat landscape
- * 9 Steps for building an effective Insider Threat Defense Program
- * Behavioral Analytics + Context = Security Operation Optimization

Keep insider threats at bay from the inside out.

June 22, 2016 Topic

New DFARS Cybersecurity Requirements for Defense Contractors

After the OPM breach last summer, DoD contractors and their subs were hit, practically overnight, with new Cybersecurity requirements added to contracts through DFARS Clause 252.204-7012 “Safeguarding Covered Defense Information and Cyber Incident Reporting”. Working through the obscure wording, coming to consensus on the interpretation of these new cybersecurity controls and then planning and paying for deployment of multifactor authentication to be compliant by the December 31, 2017 deadline is a challenge for any DoD contractor and subcontractor.

In this session, you will learn a little about the new DFARS Cybersecurity requirements (and NIST 800-171) and hear some insight into the steps JHU/APL followed to work through the process.
