Contemporary Challenges for Cloud Service Providers Seeking FedRAMP Compliance

The Federal Risk and Authorization Management Program, FedRAMP, is a government-wide assessment and compliance program providing a standardized approach for Cloud Service Providers (CSP) and other organizations delivering SaaS and related products and services to government clients. Although FedRAMP is a well thought out and structured framework, CSPs and other providers will invariably face serious challenges when seeking an assessment, potentially resulting in significant losses in time, money, and reputation if not prepared. Engaging knowledgeable advisory services and experienced third-party assessors is essential to successful outcomes and greater business opportunity.
