InfoSec Observations from the Life of a Security Consultant

What's the difference between companies that have solid, mature information security programs and ones that seem to be constantly struggling to keep up? After working with many companies across multiple verticals and varied sizes, there are plenty of lessons to be learned from observations made across the industry. We will be taking a closer look at a few key information security trends and how you and your organization can improve your information security posture.

Chris Hall, Wapack Labs

Chris has been in the intelligence community for over 16 years in various capacities including SIGINT, network defense, reverse-engineering, and fusion. In 2012, Chris moved from the government to the private sector to help form the Red Sky alliance and then co-found Wapack Labs in 2013. As a partner at Wapack Labs, Chris's main responsibility is to oversee the production, sourcing, and collection of intelligence.

The Missing Link in the Supply Chain

In recent years, the global supply chain has become the new "playground for hackers". With supply chain inherently having numerous links (from suppliers to manufacturers to distributors), the number of potentially exploitable relationships makes it an attractive target. This presentation includes the 'how' and the 'why' of supply chain attacks and describes several notable malware campaigns affecting supply chain in multiple industries
