Central Maryland Chapter

Please respect the speakers and other members,

Silence or turn off cell phones and electronic devices,

No video or audio recordings.

Questions are welcome; please keep them on-topic and brief. Further discussion should be taken off-line with the presenters so as to allow them the courtesy of being able to finish their presentations within the allotted time without being rushed.

Sidebar discussions should be constrained. If you must discuss something, allow your fellow members (and the presenter) the courtesy of doing so outside or on break.

May 22, 2019 Speaker
Alex Grohmann, Sicher Consulting

Alex Grohmann has over two decades of experience in technology-related information security, risk management and data privacy. During his career, he has worked at both the state and Federal level, and his private sector involvement has spanned from energy to financial services. He is the founder and operator of Sicher Consulting, LLC. Mr. Grohmann holds industry certifications of CISSP, CISA, CISM and CIPT. He holds two bachelor degrees from Florida State University as well as an MBA from UMUC.

Mr. Grohmann is a Fellow at the Information Systems Security Association (ISSA), an international organization of information security professionals. He is the recipient of their international 'Honor Roll' for his lifetime contributions to the information security community. He has served on the board of directors for the Northern Virginia chapter of ISSA for over ten years, including as president for three. During his time, the chapter won the Chapter of Year.

He is a graduate of the FBI's Citizens' Academy and served on the board of directors for the Washington DC chapter of InfraGard for four years. Currently Mr. Grohmann serves on the board directors of Northern Virginia Community College's Workforce Development taskforce, NOVA Cybersecurity Advisory Board and is an mentor at MACH 37, the Virginia cyber security accelerator. He also sits on the IT sector coordinating council (IT-SCC).

May 22, 2019

Topic: RMF 2.0 for non-Federal Users

Learning objectives

1) Understanding of the NIST Risk Management Framework
2) Briefing on the updates to Revision 2.0 of NIST 800-37
3) Walk through of a fictitious Federal Agency system undergoing the RMF process

The target audience are those who have not yet dealt with the NIST RMF and would like to understand the various components and how it would apply to a specific computer system. The talk will start with the steps included in the RMF process and will end with the review of the controls within one or two control families.

April 24, 2019 Speaker

Mike Volk, VP, Cyber Risk Solutions

As the lead for PSA's Cyber Risk Solutions Practice, Mike Volk is responsible for helping clients make informed decisions about cyber insurance and develop strategies to reduce cyber risk. For the past eight years he has worked in several roles where he helped individuals and organizations navigate the complex cybersecurity landscape. Mike is engaged in the cybersecurity community and currently serves on the Board of Directors for the Cybersecurity Association of Maryland, Inc. (CAMI).

Prior to joining PSA, Mike worked with individual job-seekers, industry experts, as well as government organizations and contractors in areas related to cybersecurity training and workforce development. He has authored several articles on topics related to cyber risk, cybersecurity education/training and cybersecurity workforce development.

Mike contributed to Anne Arundel Community College as the Business Development Coordinator for the CyberCenter and Instructional Specialist for the Cyber and Technology Training area. He also served as the Cybersecurity Navigator and Project Coordinator for the Mayor's Office of Employment Development in Baltimore City.

April 24, 2019

Cyber Insurance

Cyber risk management is something that continues to evolve with the threat landscape as well as innovations in processes and technology. One of these new innovations is the emergence of cyber insurance. While it is new in terms of insurance products it has been around for several years and is quickly developing into something that many commercial organizations are starting to consider. The purpose of this presentation is to provide an overview of the cyber insurance marketplace, the underwriting process and a shallow dive into the coverage provided by a typical policy.
