Chapter**

Please respect the speakers and other members,

Silence or turn off cell phones and electronic devices,

No video or audio recordings.

Questions are welcome; please keep them on-topic and brief. Further discussion should be taken off-line with the presenters so as to allow them the courtesy of being able to finish their presentations within the allotted time without being rushed.

Sidebar discussions should be constrained. If you must discuss something, allow your fellow members (and the presenter) the courtesy of doing so outside or on break.

August 18, 2019 Speaker **Tom Hallewell**

Tom Hallewell works for the Government. He's also VP of Programs for ISSA-DC. He's worked in just about every area of cybersecurity, and has the scars to prove it. Hopefully this talk will help you avoid getting them yourself. Tom Hallewell is the VP of Programs and Event for the ISSA DC Chapter

Fail Secure: 20 Ways to Undermine Your Security Program

There's policy, and then there's reality. All too often, security teams find their efforts overridden or bypassed. Here's some unconventional wisdom and tips on how to engage your stakeholders and keep your program moving forward.

July 24, 2019 Speaker

Courtney Chau, Systems Engineer, Varonis Systems

Bringing a diverse business and technical skill set, Courtney Chau has had the privilege of working with an elite list of clientele in the Cyber Security & Information Technology sector. Courtney's commitment to continued learning and academic excellence provided the opportunity for a year of early completion at Virginia Tech with a B.S. in Business Information Technology, *summa cum laude*, and minor in Applied Business Computing. Courtney embarked on her professional journey in IT Risk Assurance at the multinational professional services network firm PricewaterhouseCoopers (PwC), providing superior client relationship management to cultivate efficient and innovative business solutions. She collaborated with multiple teams, inter-company lines of service, clients, and client third-party service organizations for multiple projects regarding interfaces/configurations, key reports, SDLC, and other IT general controls. Following this, Courtney served Darktrace as a Cyber Defense Technology Specialist to manage deployments and incident responses, ranging from small business to global firms across a variety of industries. She mentored a team of engineers and holds substantial experience covering a global territory. Presently, she works with Varonis to serve the data security needs of large enterprise customers.

Attackers Prey on Uncertainty: How to Fail at Threat Detection

It takes a lot of visibility and context to detect and respond to sophisticated threats. Attackers usually target data, where enterprises have the least visibility and most uncertainty. In this session, we'll explore new, sophisticated threats from inside and out, demonstrate how easy it is for adversaries to bypass traditional controls, and present a methodology to better protect data at scale, improve threat detection, and reduce uncertainty.
