Please respect the speakers and other members,

Silence or turn off cell phones and electronic devices,

Questions are welcome; please keep them on-topic and brief. Further discussion should be taken off-line with the presenters so as to allow them the courtesy of being able to finish their presentations within the allotted time without being rushed.

Sidebar discussions should be constrained. If you must discuss something, allow your fellow members (and the presenter) the courtesy of doing so outside or on break.

Crash Course in PowerShell

December 14 @ 8:30 am - 4:30 pm
UMBC Training Center

This course will give you the basics of PowerShell. You will learn the PowerShell syntax, as well as various other topics (examples: how to repeat tasks, how to iterate through a list of objects, and the various things you can do with PowerShell objects). You will also learn how to discover new cmdlets, modules, and functions. You will gain hands-on experience by practicing what the instructor is teaching, and demos of production scripts and tools. The target audience for this course are individuals who are new to scripting and individuals who are new to PowerShell.

Michael C. Long II

Senior Cyber Adversarial Engineer, The MITRE Corporation

Michael Long is a Senior Cyber Adversarial Engineer with the MITRE Corporation and a former U.S. Army Cyber Operations Specialist. Michael has over 10 years of experience in information security disciplines including adversary threat emulation, red teaming, threat hunting, and digital forensics and incident response. Michael Long has a proven track record of service in the public interest. Michael served on countless cyber operations for organizations including the Army Cyber Protection Brigade and Army Cyber Command, the results of which he regularly briefed to commanding generals, strategic executives, and congressional staffers. With MITRE, Michael continues to apply his technical expertise to improve the cybersecurity of our nations most sensitive and critical networks. Michael has a Masters Degree in Information Security Engineering from SANS Technology Institute and holds many information security certifications including the prestigious GIAC Security Expert certification (GSE).

November 20, 2019

Threat Informed Defense with MITRE ATT&CK™

The MITRE ATT&CK framework has become a widely used knowledge base and model for real cyber adversary behavior. In use across governments, private sector, and security solutions providers, ATT&CK helps to focus defenses against known threats, provides an effective tool for measuring security improvements, and drives innovation.

The session will cover the history of ATT&CK and what drove its creation at MITRE, the philosophy behind how ATT&CK is maintained, and several use cases for how it can be applied including behavioral analytic development, defensive gap analysis, and adversary emulation.
