

Please respect the speakers and other members,

Silence or turn off cell phones and electronic devices,

Questions are welcome; please keep them on-topic and brief. Further discussion should be taken off-line with the presenters so as to allow them the courtesy of being able to finish their presentations within the allotted time without being rushed.

Sidebar discussions should be constrained. If you must discuss something, allow your fellow members (and the presenter) the courtesy of doing so outside or on break.

Agenda / Announcements

- ➤ Welcome to The Hub Spot
- >Any guests or new members in attendance?
- ➤(ISC)² CPE Submissions Individual Responsibility
- CISSP Chapter Badges / Shirts and Jackets with ISSA-Central MD Logo
- ➤ CISSP & Study Group
- >Future Meeting schedule

- ❖ Bill Smith, Jr., CISSP, GSNA, CEH, GPEN, GCFA, GCFE President
- Sidney Spunt, CISSP VP Operations
- Dr. Nagi Mei, Security+, PMP, SAFe, CSM, ITILv3- Secretary
- Elizabeth Bublitz VP Professional Development
- Kevin Newman, CISSP, GCIH VP Education
- Seth Wilson Treasurer
- Steve Chan, CISSP, PMP VP Membership
- ❖ Keith Bull, CISSP VP Outreach

ISSA 2017-2018 Meetings and Events

Date	Speaker	Organization	Topic
December 18, 2019	Razvan Miutescu	Whiteford, Taylor & Preston LLP	Customer Contract Issues for Cybersecurity Service Providers
January 22, 2020	Michael Morgan	Tenable Network	The Next Gen of Vulnerability
	Chris Edson	Security	Management

January 22, 2020

Michael Morgan Chris Edson Tenable Network Security

Mike Morgan & Chris Edson have been helping customers understand the need for protecting their network, both on-prem and in the cloud for over 10 years. They have been instrumental in advocating and supporting clients to introduce, implement, and build out vulnerability management programs leading to a greater understanding of risk.

January 22, 2020

The Next Gen of Vulnerability Management

Traditionally, Vulnerability Management has become entrenched in the CVSS scoring system which itself, has undergone some revision to more appropriately address things like exploitability, degree of sophistication and human intervention. While CVSS allows centralization of data and a consistent scoring system, it falls short of adequately addressing risk from a dynamic perspective. We've seen the industry shift in the last few years to a realization that every vulnerability cannot be addressed, inclusion of individual threat feeds and a more specific approach to dealing with risk. As a result, the landscape has shifted to a pro-active approach to identify where the best value can be aimed on the vulnerabilities that are most important.

December 18, 2019

Razvan Miutescu

Business, Technology, and Information Governance Attorney, Whiteford, Taylor & Preston LLP

Razvan Miutescu is a technology and information governance attorney with Whiteford, Taylor & Preston. His practice focuses on privacy; data security; information technology transactions; licensing; and data management, including data broker transactions, cloud services, and distributed ledgers/blockchain technology matters. He has been a co-chair of the Data Privacy, Cyber Security & Technology committee of the Maryland State Bar Association since 2015 and is an active member of the tech community in the Baltimore-DC area.

December 18, 2019

Risk Mitigation Strategies for Cybersecurity Service Providers

Everyone is talking about "vendor risk" and "vendor management" on the client side, but who's looking out for the risks that your cybersecurity product or service company faces when helping those same clients by licensing a cutting-edge cyber tool, conducting a penetration test or risk assessment, providing post-breach forensic services, or otherwise helping a customer deal with its privacy and data security risks? This session will focus on a few key areas of concern when negotiating customer contracts.
