| February 23, 2022 | Laurie Gordon | Aerospace Corp. | |

** November monthly meeting will be on Thursday the 18th

October 27, 2021

# Cliff Stoll, Founder of Acme Klein Bottles

Dr. Cliff Stoll has had a variety of careers over his lifetime.  Presently he is the CBO (Chief Bottle Officer) and founder of Acme Klein Bottles.  He is also an author of 3 books: The Cuckoo's Egg, Silicon Snake Oil, and High Tech Heretic.  He was a System Administrator at Berkeley.  He is also an astronomer.  And as a self-proclaimed mad scientist, he has one major accomplishment that few people in the world can claim; he successfully tracked a nation state spy through the Internet.  In his search for a 75 cent glitch, he highlighted problems with the network and created some unique solutions that helped the advancement of intrusion detection and digital forensics.

October 27, 2021

# Intellectual Property Espionage

Cliff will talk about an intellectual property espionage case study and discuss how focused curiosity can help you develop solutions.

# September 22, 2021
## John Humenick,
## Cybersecurity and Business Risk,  Optiv

John is based in the Philadelphia region and has been working the IT industry for over 20 years.  During that time, he has covered system integration, coding and development, virtualization, and more recently cybersecurity and business risk.    John is based in the Philadelphia region and has been working the IT industry for over 20 years. During that time, he has covered system integration, coding and development, virtualization, and more recently cybersecurity and business risk. He has worked as a Solutions Architect at Optiv for the last five years and is a graduate of Penn State.

# September 22, 2021

## "Zero Trust Is Not a Destination, But A Continual Journey"

As you are aware, there is a lot of confusion on what "Zero Trust" is.  Most of this comes from different technology manufacturers marketing their products as the solution to Zero Trust.  While all of them play some part in an overall Zero Trust journey, there is no platform which provides a full Zero Trust solution.

Optiv's opinion is that Zero Trust is a not a destination, but instead a continual journey that provides a broader systematic approach to help clients demystify the complexities of Zero Trust.
