September 27, 2017 Speaker

Curtis Bragdon, Director of Sales, Code Dx

Curtis Bragdon has over 20 years' experience designing and deploying software systems, helping teams design more secure software, and selling technical tools throughout the enterprise. Over the past 10 years, he has focused on cybersecurity at the network and application level, helping hundreds of companies secure their systems. At Code Dx, he helps companies build security into the Software Development Lifecycle

September 27, 2017 Topic

SDLC: How to Get Adoption

Most companies have some form of a security initiative for custom applications. Whether this is driven by regulations, a past incident, executive awareness or other factors, development managers understand the need to promote and/or enforce secure development practices. While striving for consistently secure code and continually improving code security is a goal development teams share, actually achieving that relies on the enthusiasm of individual developers. Based on hundreds of customers across many industries over the course of 10 years, we will discuss common practices for building application security into the SDLC, and note which ones have been the most successful. We will also offer ideas on emerging practices that may further promote application security in process.

August 23, 2017 Speaker

Michelle C. Lapuente, LogRhythm

Michelle C Lapuente has been with LogRhythm for over five years with previous experience at Dell and other tech start-ups. She comes most recently from the banking and finance industry. A graduate of the University of Texas at Austin in Economics and Spanish, Michelle is focused to helping security professionals solve security challenges within their organizations. Additionally, she is a six time Ironman finisher, a fan of wine, and dogs.

August 23, 2017 Topic

Threat Lifecycle Management

Why having a response strategy to cyber incidents is just as important as a prevention strategy and leveraging co-managed services as a force-multiplier to make the most of your security program.
