## Updates to Meeting Schedule – May 2019

5:15 to 5:45 Business Meeting

5:45 to 6:15 Networking and Dinner

6:15 to 7:45 Speaker and Q&A

**Central Maryland Chapter Sponsors:**

Zscaler, Clearswift, LogRhythm, Parsons Cyber,

Phoenix TS, Tenable Network Security

**ISSA**  
Information Systems Security Association

**ISSA**  
Information Systems Security Association

**Central  
Maryland  
Chapter**

Please respect the speakers and other members,

Silence or turn off cell phones and electronic devices,

No video or audio recordings.

Questions are welcome; please keep them on-topic and brief. Further discussion should be taken off-line with the presenters so as to allow them the courtesy of being able to finish their presentations within the allotted time without being rushed.

Sidebar discussions should be constrained. If you must discuss something, allow your fellow members (and the presenter) the courtesy of doing so outside or on break.

## 2019 ISSA Fellows Cycle Now Open

<https://www.issa.org/page/FellowProgram>

### **Fellows Program:**

- Recognizes significant contributions to the cyber community, cyber profession, ISSA leadership and sustained ISSA membership.
- Fellow status limited to 2% of the ISSA membership.
- Distinguished Fellow limited to 1% of ISSA members and
- 2019 Fellows nominations and applications will be accepted through June 16, 2019.

### **Senior Member:**

- 5 years of ISSA membership
- 10 years relevant professional experience

## Mentoring Program

The Central MD ISSA Chapter is looking to launch of a new mentorship program! The program is designed to formalize relationships between more senior professional individuals in the chapter (Mentors) and security professionals seeking to learn from these people to gain skills or further their career (Mentees).

## Topic: RMF 2.0 for non-Federal Users

### Learning objectives

- 1) Understanding of the NIST Risk Management Framework
- 2) Briefing on the updates to Revision 2.0 of NIST 800-37
- 3) Walk through of a fictitious Federal Agency system undergoing the RMF process

The target audience are those who have not yet dealt with the NIST RMF and would like to understand the various components and how it would apply to a specific computer system. The talk will start with the steps included in the RMF process and will end with the review of the controls within one or two control families.

June 26, 2019 Speaker

## **Ryan Dobbins, Director of Advisory Services, Infolock**

Ryan Dobbins is Infolock's Director of Advisory Services and helped develop the Data Risk Management Framework (DRMF). A graduate of James Madison University, Mr. Dobbins holds the SANS GSLC certification and is active in the Governance, Risk, and Compliance (GRC) community where he offers his expertise on topics such as:

- Strategic Data Governance
- Aligning Compliance Goals with Real Security
- Reducing Enterprise Risk with Data Loss Prevention
- How to Use a Control Framework to Build a Security Program.

In addition to his work at Infolock, Mr. Dobbins was a featured speaker at VA HIMSS (2017), the AMC Security Conference (2017), the NCHICA Conference (2016), and the AMC Conference (2016). Prior to Infolock, Mr. Dobbins developed and managed the information security program at a multi-billion-dollar healthcare enterprise, including its GRC system and Security Operations Center. In this role, Mr. Dobbins and his team worked to detect, respond to, and report on technical security issues. During this time, they responded to internal and external security audits, formed business relationships with various organizational units and provided corporate guidance on security related issues. The results of their findings were scored against HITRUST and internal policies and added to the GRC system for risk-tracking and remediation. Later, these results were published to a wide audience across a number of formats, including executive dashboards and technician remediation paths.

## Data Loss Prevention Essentials

*A how-to primer on overcoming organizational challenges to implement a successful Data Loss Prevention program.* Advances in technology have prompted a rapid evolution of business processes over the last two decades. Along with the benefits provided to organizations, these advances have brought about new types of risks. Data has become the lifeblood of organizations, yet many do not know what data they have, what is important, or how it is being used. A Data Loss Prevention program provides insight into these new risks, but organizations are often ill-equipped to respond to this new information or manage the associated risks.

Infolock's Director of Advisory Services, Ryan Dobbins, will discuss the three main areas required for a successful implantation:

*Governance:* The organizational articulation of what data is important and how it is measured

*Visibility:* The technical ability to make informed decisions

*Protection:* The enforcement of organization risk tolerance

A successful DLP program supports and informs organizational leadership as they manage data risk and minimize the occurrence and impact of data incidents. Attendees will leave this presentation with an understanding of how to turn DLP technology into a holistic program to reduce organizational risks.
