Insider Threat Day September 1, 2020

Virtual Event

The Insider Threat Day with Johns Hopkins University Applied Physics Lab, hosted by the ISSA Central Maryland Chapter, will take place on Thursday, September 1, 2020. This one-day event will be part of the Insider Threat Awareness Month declared by the U.S. National Counterintelligence and Security Center (NSCS) and the National Insider Threat Task Force (NITTF). The goal of Insider Threat Day is to raise awareness and help organizations develop proactive strategies for detecting and combating these threats, as well as to reduce the risk of compromised information.

Register at <https://www.fbcinc.com/e/JHU/attendeereg.aspx>

- Early Bird registration price for Industry is \$75 and ends on 7/31/2020. Afterward, the registration price will be \$100.
- There is no cost for Government, ISSA members, or JHU/APL Employees to register for this event.

(ISC)² Security Congress

Join thousands of leading cybersecurity professionals virtually at (ISC)² Security Congress 2020 November 16-18. You will hear expert insights into the latest security challenges, and share best practices for combating threats, building teams and implementing the latest processes and procedures to better defend your organizations' critical assets. We will discuss the latest issues facing the workforce, explore pathways for career advancement and discover new tools and solutions together.

Attend (ISC)² Security Congress from home and take advantage of the powerful collaboration that you can only find at a conference of your peers who are dedicated to helping one another solve the challenges we all face.

Early Bird pricing to (ISC)² members and associates of just \$295 for an All-Access pass. Non-members will also benefit with Early Bird pricing of \$395. Registration details will be announced when open. The Early Bird window will close on September 30. Registration and more information can be found at:

Bob Nicholson

Business Development Executive, Dell Technologies, Federal

Bob Nicholson is currently a Business Development Executive for the Dell Technologies' Federal team with a concentration on Federal Civilian agencies. Bob has been serving in this position for 5 years but brings more than 25+ years of solutioning experience in support of the public sector.

For 15 years he served as a cybersecurity leader and solution architect within the federal government which included designing and implementing many enterprise solutions and establishing many best practices. Many of these as a result of Federal mandates, Bob has a great deal of experience working within government, in coordination with its many bodies of governance, and throughout industry. He has transferred this knowledge and relationships into not only being a strong advocate for innovation within government, but also a facilitator for ensuring its success.

Security Operations 2.0

With Dell Technologies being looked at as a key innovator in response to the rapidly changing workforce, Bob will layout a vision of what the next-gen security operations will begin to look like. Based on his past experience as a cybersecurity director and his current outlook within Dell Technologies, Bob will explore how technology will drive how we assess risk, manage and mitigate risk, and provide situational awareness. Enablers for remote workforce, multi-cloud operations, and enhanced intelligence all play a role in every agency's modernization strategy. But should how you secure these new environments change how you think about securing the rest?

John Perkins **Founder, ThreatAngler**

John Perkins is the Founder of Threat Angler and brings over twenty years of cybersecurity experience. During the first fifteen years of his career at the Federal Reserve, he contributed to nearly all cybersecurity disciplines. John spent the next five years designing, building, and leading managed security services with Optiv, GuidePoint, Insight Enterprises, and other service providers. John's passion is to build a sustainable managed security service focused on delivering cybersecurity value outcomes while developing cybersecurity talents in team members.
