ISSA Special Interest Groups

<https://www.members.issa.org/general/custom.asp?page=ISSASpecialInterestGroups>

ISSA has many opportunities for members to form and participate in global initiatives and working groups. As a member, you can choose to be active in one or more of these Special Interest Groups (SIG).

Women in Security Special Interest Groups

Mission: Develop global women leaders and build a stronger community to create a compelling environment around cybersecurity and technology.

Privacy Special Interest Group (SIG)

This group is dedicated to providing privacy relevant topics to security professionals through thought leadership and a knowledge-sharing platform. The Privacy SIG will be hosting quarterly webinars and providing concise and timely privacy-related information.

Cyber Resilience Special Interest Group (SIG)

Mission: Build a global community of Cyber Resilience professionals in order to share actionable best practices to protect our organizations from cyber-attacks on high value assets.

The CyberMaryland Conference is an annual event presented by the CyberMaryland Advisory Board in conjunction with academia, government and private industry organizations.

This annual 2-day educational conference and trade show will be held at the College Park Marriott Hotel & Conference Center on December 6th and 7th, 2023. We invite you to join us at this premier event providing networking opportunities to share information, encourage the ongoing development and knowledge base of cyber security on all levels from professionals in the industry to students and educators alike.

For over 10 years Cyber Maryland has been expanding and educating the cyber security industry in the state of Maryland. This event initially was developed under Governor Martin J. O'Malley to bring the best of cyber security together in Maryland and shed a light on the state as a hub for cyber professionals, government, businesses, educators and innovators. Utilizing and working with some of the most notable professionals in the industry and the Cyber Maryland Advisory Board, we bring together the leading innovators and educators to bring the cyber security industry to the next level.

When disaster strikes... what you can do to prepare till help arrives.

A police officer is many things in one. At times a police officer must be a peacekeeper, a counselor, an enforcer, and a life saver. All these jobs carry the responsibility of knowledge in all fields. A police officer must understand mental health issues, information security, local and state laws, criminal and civil laws, and emergency medicine. A police officer is the first person to arrive in an emergency and must act quick and efficiently. Many police officers obtain specialties that further advance them toward solving problems. Teresa specialties are aimed a lifesaving operations and preservation of life after disaster strikes.

Dawn M Greenman, Program Manager Cybersecurity Compliance Johns Hopkins Applied Physics Laboratory (JHU/APL)

Dawn M Greenman is Program Manager Cybersecurity Compliance for Johns Hopkins Applied Physics Laboratory (JHU/APL). In this position, she oversees the cybersecurity compliance and supply chain risk management strategy across the organization. Since 2013, she has ensured JHU/APL's compliance with DFARS 7012 and NIST SP 800-171. During this time, she developed relationships with the small business community and learned of the unique challenges small businesses had meeting the cybersecurity requirements. Ms. Greenman became an advocate for small businesses. She helps lead working groups with DoD and industry to develop strategies to help small businesses improve the protection of controlled unclassified information.

Through JHU/APL, Ms. Greenman also worked for 3 ½ years with DoD CIO and DoD Office of Sustainment and Acquisition to develop and support the Cybersecurity Maturity Model Certification (CMMC) Program.

Ms. Greenman holds an undergraduate degree in Information Systems with a concentration in Homeland Security and an Executive Masters of Business Administration from The University of Maryland Robert H. Smith School Of Business. She is a Certified Information Security Professional (CISSP) and holds the GIAC Security Essentials (GSEC) certification.

Cybersecurity Maturity Model Certification (CMMC)

DoD's Cybersecurity Maturity Model Certification (CMMC) Program was designed to provide increased assurance to the DoD that a DIB contractor can adequately protect sensitive unclassified information (i.e., FCI and CUI) at a level commensurate with the risk, and accounting for information flow down to its subcontractors in a multi-tier supply chain. CMMC was initially implemented as an interim DFARS rule in September 2020 (DFARS Case 2019-D041). In March 2021, in response to over 850 public comments, the program was modified and streamlined to CMMC 2.0. The revised CMMC Program aligns with existing cybersecurity models. Once implemented through the rulemaking process, when applicable through acquisitions vehicles, CMMC requirements will be required for prime contractors and their subcontractors. While the rule is being finalized, it is important to continue to prepare now! Come learn more about CMMC 2.0 and recommended next steps.
